

Audio Podcast: Fiber Conveyance on the Road

August 27, 2008 12:00 PM

Fiber Conveyance on the Road

In Sound & Video Contractor's AV over Fiber podcast series, listen in as SVC contributor and freelance AV specialist Bennett Liles talks with manufacturers, systems integrators, and users about trends in fiber and AV applications.

In this edition, Liles talks with Frank Jachetta, senior vice president for sales and operations with [MultiDyne](#), a leading manufacturer of fiber products for video, audio, and data transmission. Their discussion centers on Multidyne's new [LiGHTBoX](#), a tough, field-ready terminal box with customizable connections for fiber conveyance on the road. They also have a look at some other fiber transmission products from Multidyne.
