**Small Shows Find New Support in Dotcom Mobile Truck**

*(Excerpt from Sports Video Group article on sportsvideo.org by Carolyn Braff)*

"We felt that there was a major need for some small HD trucks, so we went to MultiDyne and asked them to design fiber-optic sheds for our cameras," Heitmann explains. "Our cameras are all done on fiber, so we had to get data, audio, video, and comms all on fiber. MultiDyne basically took their LiGHTBoX product, a bidirectional-field fiber transport, and redesigned it to suit our JVC cameras."
